

PAASCHE'S 3 in 1 AIR BRUSH

THE
BEST
OF THEM
ALL
FOR
WINDOW
BACK-
GROUNDS,
SHOW
CARDS,
ETC.

Paasche's "3 in 1" air brushes have been made and designed especially for window trimmers, card writers, sign painters, etc., and the special features in their construction makes it possible to cover the widest range, not possible with any other spraying device or air brush. The "3 in 1" feature is one of great importance, as colors of all descriptions can be used and the widest range of uses thereby made possible.

One of the Many
Popular Models.

The accompanying illustration shows only one of the five different models we manufacture for these purposes and of these the "3 in 1" Model "D"-2 and "H"-2 are the best for all around show windows, sign and decorative work, cards, etc. Our smaller models are the most popular for all around card writing, making of price tickets, show cards, etc.

EVIDENCE

Surpasses Them All

Received the air brush in good condition, and must say that the PAASCHE Air Brush surpasses them all, in my estimation. It speaks for itself and is certainly a business-getter—HOWARD A. WERNET, Canton, Ohio.

Would Not be Without One for Any Amount of Money

This will be my third outfit, and allow me to say that your brushes are above par, and I would not be without one for any amount of money.—A. C. IRONS, Manager, The Boyer Theaters, Martinsburg, W. Va.

Covers Largest Range of Work

I like my Model "E"-2 Brush better than any I have ever seen. It fills all the requirements and covers a larger range of work than any other brush I have ever seen or heard of. Yours truly, O. R. BOUNDS, Lapwai, Idaho.
